

WebControl - USB Installation Instructions

Once WebControl-Install.zip has been downloaded, extract WebControl-Install.tap and copy it to a USB drive.

Connect the USB drive to your PVR. The following message should appear:

Use the  "File List" button to display the "Recorded Program" screen.

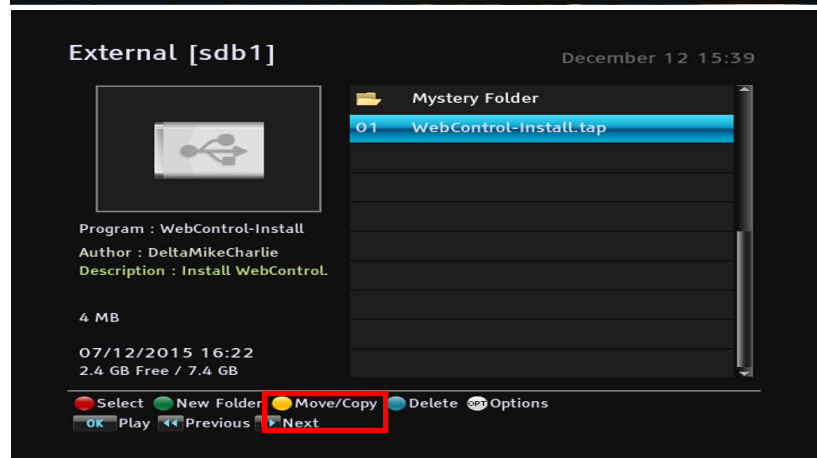

Use the  "<<" button to navigate until the "External Drive List" window is displayed.

Select your USB drive and press "OK".

Highlight "WebControl-Install.tap".

Press the  "Move/Copy" button.

WebControl - USB Installation Instructions

Select "Program Files [Internal]" as the destination and press "OK".

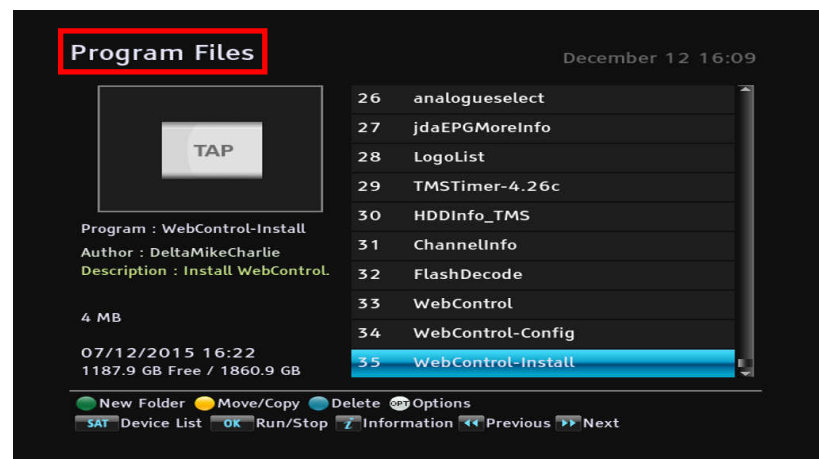

Once the copy is complete, the "File copy success" message will be displayed.

Use the  "File List" button to display the "External [sdb1]" screen.

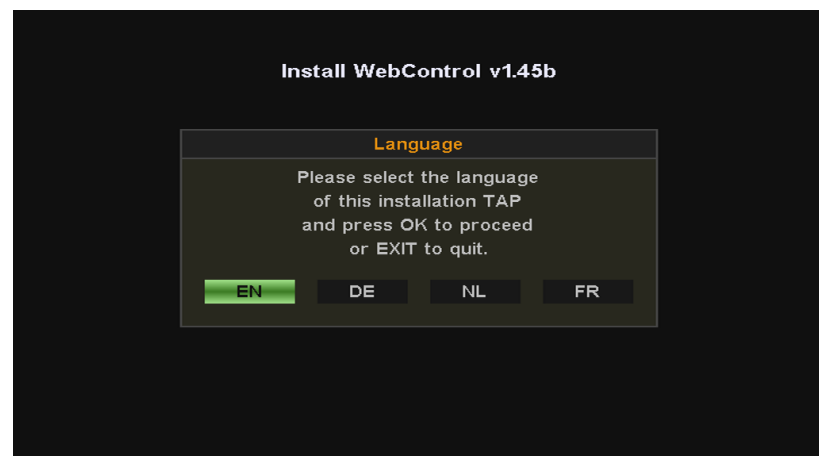

Use  "<<" to navigate to the "Program Files" Screen.

Highlight "WebControl-Install" and press "OK".

Select the language for the installation process and press "OK".

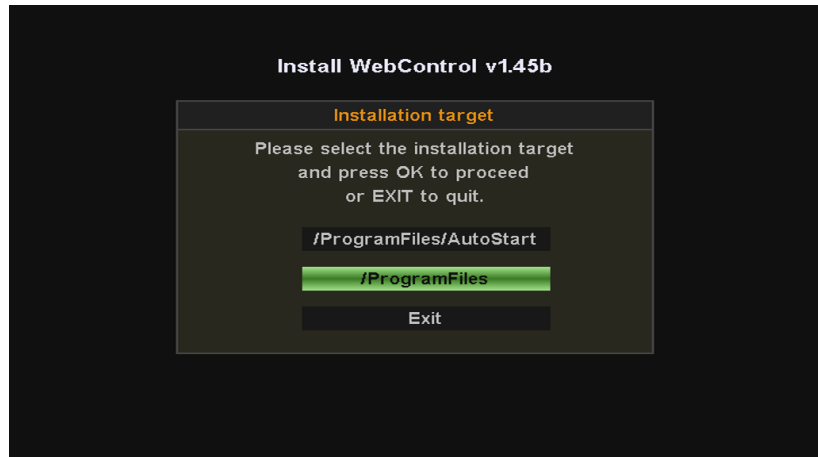

Note: This selected language is only used for the installation process.

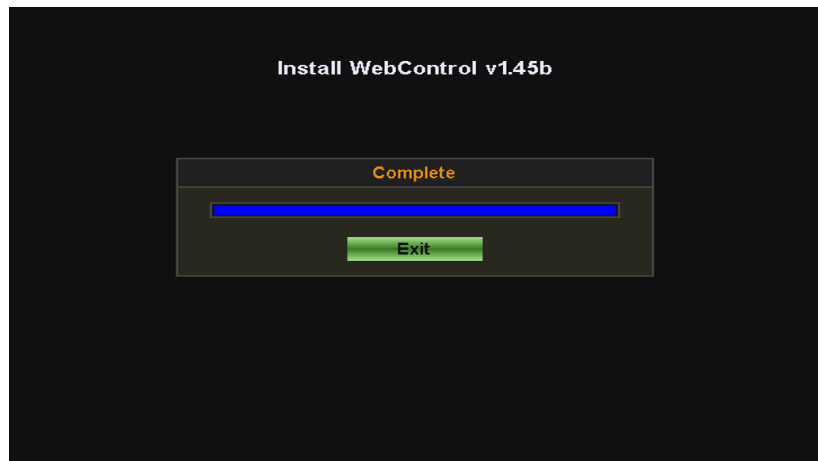

WebControl - USB Installation Instructions

Select the installation target and press "OK".

Note: If you want manual control over when WebControl starts, select "/ProgramFiles". If you want WebControl to start automatically when the PVR starts, select "/ProgramFiles/AutoStart".

A progress bar will be displayed until the installation process is complete.

Use the  "File List" button to display the "Program Files" screen.

Highlight "WebControl-Config", press "OK".

Follow the directions in the Setup instructions document.
